Image Editor using HTML5
An Online Image Editing Software based over HTML5 and Canvas having very basic features like brightness, contrast, sepia, hue etc.

Chain Reactions
A multiplayer game built over kinetic.js and canvas with a backend service of node.js. you can play it at chain-reaction.nodejitsu.com

INTERESTS

Love working over web and mobile applications involving cloud integration.
Always interested in newer technologies in mobile and web like node.js, docker etc.
Algorithm designing and problem solving also excites me alot.
